👤 PROFILE

I am the highly energetic person to face any challenge in the field of Forwarding. Where the contribution will be acknowledged if I am given an opportunity. I aim to ensure customer satisfaction, loyalty, and retention, contributing to the growth and success of the organization.

👜 PROFESSIONAL EXPERIENCE

11/2022 – present
Dhaka, Bangladesh

Tech analytica limited

Jr. software engineer

MERN STACK DEVELOPER:

Font-End

- **Select the APIs:** Identify the external services or data sources you want to integrate with
- **Axios or Fetch:** Use a library like Axios or the built-in fetch API to make HTTP requests to the external APIs.
- **Handling Responses:** Once you receive a response from the API, you'll need to parse and process the data accordingly.
- **Firebase Authentication:** Firebase Authentication is a solid choice for user authentication.
- **Firebase Realtime Database:** Firebase Realtime Database is a NoSQL, real-time database that's suitable for storing real-time data like financial transactions.
- **React.js:** React.js is an excellent choice for building interactive user interfaces.
- **Next.js:** Next.js is an excellent choice for building interactive user interfaces.
- **Material UI:** Material UI is a popular library for creating consistent and visually appealing user interfaces in React applications.

Back-End

- **Node.js:** A runtime environment that executes JavaScript code on the server side. It's well-known for its event-driven, non-blocking I/O model, ideal for building scalable network applications.
- **Express.js:** A minimalist and flexible Node.js web application framework, that simplifies server-side logic and API development.
- **DATABASE:** Your choice of a NoSQL or SQL database, offering flexibility in handling unstructured data. Like: MongoDB, MySQL, Postgresql
- **Prisma:** Prisma simplifies database interactions. Define your data model in the Prisma schema, generate Prisma Client with the CLI, and use its auto-generated methods in code for CRUD operations. Execute migrations via CLI to sync database changes with the Prisma schema.
- **Postman:** Postman is an API development environment. Create requests by specifying endpoints, headers, and parameters. Organize requests into collections, run and test them, and view responses. Utilize features like environments, variables, and testing scripts to streamline API development and testing.

EDUCATION

| | |
|--------------------------|---|
| 2020 – 2024 Dhaka | CSE Green University of Bangladesh |
| 2013 – 2017 Jhenaidah | Computer Technology Jhenaidah Polytechnic Institute |
| 2013 Pabna | General Punduria Dakhil Madrasha |

SKILLS

| | | |
|------------------------------|--|---|
| HTML HTML5 | CSS CSS 3 | JAVASCRIPT AJX, JQUERY |
| REACT.JS | TAILWIND CSS | MATERIAL UI |
| NEXT.JS TYPESCRIPT | NODE.JS EXPRESS.JS | DATABASE MongoDB, MySql, Postgresql |
| ORM Prisma | FIREBASE Authentication, Real-time Database | PWA Web App |

INTERESTED FIELDS

| | | |
|--|--|--|
| Problem Solving  Leetcode, HackerRank | Playing Cricket, Chess, Carrom | Agriculture Tree plantation, Farming |
|--|--|--|
